Basic description

**Procedure Pack with SX-ELLA Stent Danis**

Self-expandable nitinol stent preloaded in a ready-to-use delivery system. Complete procedure pack including all items required for implantation.

**Indications**

SX-ELLA Stent Danis is intended to stop acute and/or refractory bleeding from esophageal varices.

**Contraindications**

- Diagnosed malignancy or stricture affecting the esophagus
- Case history of irradiation therapy of the chest or the esophagus
- Malignancy of the throat or larynx
- Malignancy of bronchus or fistula
- Stomach malignancy
- Suspicion of bleeding due to foreign body injuring the upper gastrointestinal tract

**Features / Benefits**

- Variable pitches in stent weaving conform to esophageal peristalsis - reduced migration rates.
- Standardized compression of the varices results in effective hemostasis.
- Atraumatic stent ends.
- Radiopaque markers at both stent ends and at the midpoint - accurate stent positioning.
- Retrieval loops made of medical grade alloy at both stent ends - high mechanical durability and acid resistance.
- Easy endoscopic stent removal after 7 days.

**Benefits of the method**

- Readily implantable without endoscopy / X-Ray control, also in emergency situations.
- Patient can continue an oral diet after stent implantation.

**Additional description**

Danis Procedure Pack (019-08S-25-135) consists of a plastic carry case containing all items required for stent implantation:
- Delivery system preloaded with stent, guide wire, plastic syringes, mouthpiece, kidney dish, slobber cloth, waste bag with clip, gloves.

Danis Procedure Pack Basic (019-08S-25-135-B) consists of:
- Delivery system preloaded with stent, guide wire, plastic syringe 50 ml.

The delivery system 9.4 mm (28 F) / 6.6 mm (20 F) is available in a standard length of 60 cm.

**Available sizes**
